VALOR LINER SOCK For a sweat free liner/socket

May be worn under a liner to dramatically improve moisture management and climate control

Revolutionary Olefin fibres wick sweat away from the skin's surface

Perfectly suited to high activity amputees and those who suffer from excessive perspiration

Added compression reduces volume fluctuations

Finally the solution is here for a sweat free liner/ socket.

Build-up of sweat inside a prosthesis is a problem faced by thousands of amputees and we now have the solution. The innovative VALOR compression liner sheath draws moisture away from the surface of the skin and reduces discomfort and irritation within the socket.
